

# Key Stage 2 Tests 2023

## The Data

There are no changes in Key Stage 2 Test data in 2023.

Pupils will have scaled scores, which are normalised values, a score of 100 will be considered the expected standard.

Pupils will take tests in reading and maths, and grammar punctuation & spelling. They will be awarded raw scores for those tests and the DfE will release conversion tables to produce scaled scores from those raw scores.

The table below shows the data items collected for each pupil.

	Grammar, Punctuation & Spelling (GPS)	Reading	Maths
Raw Scores	2 raw scores added together: Grammar, Punctuation & Vocabulary (Score 1) + Spelling (Score 2) =  Raw Score Total	1 Raw Score	3 raw scored added together: Arithmetic (Score 1) + Reasoning paper 1 (Score 2) + Reasoning paper 2 (Score 3) =  Raw Score Total
Scaled Score	80 - 120 (Raw scores are converted to Scaled Scores)		
Outcomes	AS Achieved Standard		
	NS Not achieved Standard		
Other possible Outcomes	B Working <i>below</i> the level of the test	F Will take test in the <i>future</i>	P Taken test in the <i>past</i>
	J Just arrived in school	A Absent	H Pupil <i>cheating</i>
	M Missing	U Unable to access test	Q Maladministration
	L Left
