

A Young Person's Supported Internship Journey

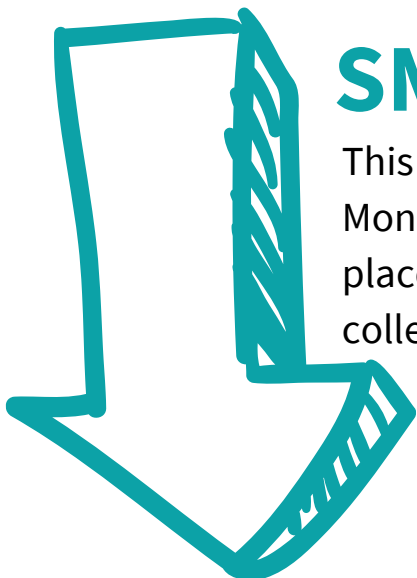

Sparsholt College

I got the love for agriculture and horticulture whilst I spent time here. I had already experienced some gardening so had that experience before to **make me want to continue**.

SMART Internship

I felt very supported here. The Deputy Gardener at Blenheim would guide me each day on the work tasks. I do a morning full of work in the gardens at Blenheim Palace. The gardens are very beautiful - I enjoyed the whole thing.

SMART Internship

This part is broken up into doing your employability on a Monday, Tuesday is life skills, Wednesday I have my placement at Waterperry Gardens, and Thursday I have a college Activate Day, where I do life skills and work skills.

It's all quite laid back and it suits me very well.
