

# Increasing recycling on campus? Free visits to inform and inspire staff and students.

Empower staff and your School Council or Eco-School Committee to lead and increase effective recycling across campus. Boost their knowledge of recycling and waste management so they can confidently communicate to nudge behavior change in the context of protecting the environment and climate change.

Inspire those directly involved from your facilities team to engaged students by visiting Ardley Energy Recovery Facility, where your non-recyclable waste is treated. Create a knowledgeable, cohesive team who will confidently educate their peers, easing the work of your facilities team, in achieving the recycling collection required by April 2025.
