BBO MATHS HUB

LEADERSHIP DEVELOPMENT PROGRAMME: SECONDARY MASTERY SPECIALIST

Are you passionate about transforming maths education?

**Do you want to develop your own teaching practice and support others
in achieving excellence?**

This is your opportunity to become an expert in teaching for mastery and lead the way in shaping outstanding maths departments.

The Secondary Mastery Specialist Programme enables secondary maths teachers to become experts in teaching for mastery, so they in turn can develop maths departments that are well-led, high-performing, and provide high-quality professional development through collaborative working.

Over a minimum of three years, participants first work on their own understanding and practice, then with their own department, then with other departments as a Local Leader of Maths Education for their Maths Hub. All the time, you keep in touch with other specialists across the country in online groups. To support you in developing your role as a leader of professional development you will be enrolled in the NCETM's PD Lead Programme during the second year of the Secondary Mastery Specialist Programme.

APPLY BY MONDAY 28TH APRIL 2025.

MASTERING NUMBER AT RECEPTION + KS1: APPLICATIONS

NOW OPEN FOR 2025-2026

Mastering Number has proved to be an extremely popular project since it started in 2021. It aims to secure firm foundations in the development of good number sense for all children from Reception through to Year 1 and Year 2. The aim over time is that children will leave KS1 with fluency in calculation and a confidence and flexibility with number.

Mastering Number
at Reception and
KS1 now recruiting

RECRUITING

Early Years Primary

✨ What's involved?

There is an expectation that schools will provide a daily teaching session for all children of 10 to 15 minutes, in addition to their normal maths lesson. Lead Teachers in schools will also contribute to an online community to share practice and engage in critical reflection.

💡 Why Join?

- Equip your pupils with deep number sense and fluency in calculation.
- Gain expert training (online and face-to-face) with high-quality teaching resources.
- Work alongside fellow educators, sharing best practices and reflecting on impactful strategies.
- Learn how to effectively use manipulatives to strengthen mathematical understanding.

👤 Who Can Take Part?

We're inviting three teachers per school (one from Reception, Year 1, and Year 2) to join as Lead Teachers. Subject leaders and headteachers will also receive some support. Open to schools new to the Mastering Number Programme

💰 Cost?

Absolutely FREE! This programme is fully funded by the Maths Hubs Programme. Schools taking part in the September 2025 start cohort of this programme may receive physical rekenreks prior to the start of the programme subject to availability from the DfE. Digital rekenreks are freely available online.

🚀 Get Involved!

This programme and its Work Groups are open to all schools that have not yet engaged with the Mastering Number Programme. To apply, please visit our website: [Mastering Number at Reception and KS1 - applications open for 2025/26 - BBO Maths Hub](#)

APPLY NOW: PRIMARY TEACHING FOR MASTERY – DEVELOPMENT 2025-2026

Every year, the Maths Hub looks to engage schools that have not yet begun their Teaching for Mastery journey.

The Primary Teaching for Mastery – Development programme, the first step in the Mastery journey, is a professional development opportunity designed to support teachers in state-funded schools to develop best practice in maths in your school. It is suitable for schools interested in implementing a teaching for mastery approach to maths.

Mastering maths means pupils of all ages acquiring a deep, long-term, secure and adaptable understanding of the subject. The phrase 'teaching for mastery' describes the elements of classroom practice and school organisation that combine to give pupils the best chances of mastering maths. Achieving mastery means acquiring a solid enough understanding of the maths that's been taught to enable pupils to move on to more advanced material.

There is a wealth of information about Mastery on the [BBO Maths Hub website](#).

To find out more about how your school can get involved in this fully funded project in 2025-2026, head to the relevant page on our website using the link below:

SECONDARY NON-SPECIALIST TEACHERS: EXCITING NEW OPPORTUNITY FOR 2025-2026

We are pleased to announce that our hub has been chosen to be part of an EEF trial for 2025/26 which will look closely at the impact of this programme on non-specialist teachers and students.

There are significant numbers of people teaching maths in secondary schools without specialist initial teacher training.

This programme supports non-specialist teachers in developing the specialist knowledge (the blend of subject knowledge and pedagogical knowledge) required for teaching maths.

It is designed to take place over the equivalent of six days, please submit your applications by deadline: **30th of June 2025** for your school to participate in 2025/26.

Who Can Take Part?

This programme is for **non-specialist teachers of mathematics** in state-funded schools in England. A non-specialist teacher is defined as:

- A teacher currently teaching some mathematics or committed to doing so within the next year.
- Someone who has **not** undertaken Initial Teacher Training (ITT) in mathematics.

Schools can enrol two teachers, but at least one must be teaching a Year 8 class. (if the class is shared, the non-specialist teacher needs to teach at least 50% of the lessons)

How to Get Involved:

This is a **fully funded** opportunity to develop your confidence and expertise in teaching maths. Schools will be randomly allocated to a control or an intervention group within their hub. Schools in the intervention group will receive the SKTM Programme, along with £500 after completing the required evaluation activities. The control group will not receive the programme and will continue with their normal practice. In addition, control schools will receive £1,000 upon completion of the required evaluation activities and will be placed on a waiting list to receive the programme in 2026/27 (subject to continued DfE funding).

Once we have received your application, we will contact you with the next steps to take part in this trial. **Applications close on the 30th of June.** Please [get in touch](#) if you need any other information. Apply via our website: [Specialist Knowledge for Teaching Mathematics - Secondary Non-Specialist Teachers - BBO Maths Hub](#)

WORK GROUPS: PLACES STILL AVAILABLE FOR 2024-2025

Places are still available on some of our Work Groups. All Work Groups can be booked online via our website: www.bbomathshub.org.uk Our projects are fully funded by the Maths Hub Programme and are therefore **FREE to attend** for teachers in state funded schools.

ITT PARTNERSHIPS COMMUNITY

This project aims to form an established group of ITT representatives across the sector who are committed to developing communities of practice to review and evolve their provision. Participants in this programme will be from the ITT community; they should be directly involved in ITT with a responsibility for maths.

They will represent the various ITT providers across the hub region so may include HEI, SCITT and School Direct, and represent different phases of ITT including EYTS, QTS (primary and secondary), and post-16. The next meeting takes place on Tuesday 29th April.

What will you learn?

- You and those responsible for maths provision at your institution will review your practice and programme
- You and those responsible for maths provision at your institution will aim to ensure trainees have some understanding of designing lessons informed by mastery principles
- Maths Hubs leaders will have a dynamic awareness of the local needs of ECTs and schools
- Maths Hubs leaders will ensure there is regular opportunity for collaboration and professional discussion of practices across ITT providers and that this dialogue informs hub work

For more information and to register your interest, please visit our website: [ITT Partnerships plus ITT Mentoring Toolkit - BBO Maths Hub](#)

We hope you find something of interest and look forward to working with you soon!

The BBO Maths Hub Team.
