

# What's difficult about maths: assessment and tailoring intervention

This course will give you an understanding of what lies behind maths difficulties with a focus on practical solutions to support children and young people. Based on emerging research, the course will equip teachers to identify the factors causing maths difficulties for a child or young person and then to tailor interventions to meet their needs.

## The Course

The course is led by the Educational Psychology Service and involves one day of face-to-face training.

Suitable for Maths Leads/SENCos and TAs supporting Maths interventions.

‘I found it a really helpful course and made me think a lot on how children may be struggling and how best to help them’

‘Thank you very much for an enjoyable and practical course!’

‘...we were able to share ideas openly with each other, which gave a nice, collaborative feel’

‘It’s given me lots of different techniques to try...’
